6. Appendix

6.1 Prerequisites required from partner:

- a) Public key and server IP of partner is required while onboarding
- b) Partner should sign up on developer portal and create an app post which API key and secret key will be shared.
- c) We are using SQL threat protection to handle this. Partner is recommended to avoid below SQL queries:

- 1) select * from
- 2) delete from
- 3) delete table
- 4) exec
- 5) drop table
- 6) drop database
- 7) truncate table
- 8) insert into
- 9) shutdown
- 10) update {table-name} set
- 11) alter table
